

## **Brooks Automation Features PreciseFlex™ Collaborative Robots, the Fastest, Safest on the Market, at AACC, Booth 2280**

**CHELMSFORD, MA** – Brooks Automation will exhibit at the 2022 [AACC's Clinical Lab Expo](#), July 26-28 in Chicago. With over 750 companies exhibiting, AACC is the premier global laboratory medicine exposition.

A longtime collaborative robot brand of choice in laboratory automation, Brooks Automation will feature its PreciseFlex™ robot models in Booth 2280. “PreciseFlex robots from Brooks Automation can automate sample processing, delivering quicker, more accurate results,” said Brian Powell, Director of Sales & Marketing with Brooks Automation. “With a focus on built-in safety and ease of use, these robots can be easily deployed in environments where space is limited and work cell access must be shared.”

Visit the Brooks Automation booth for a product demonstration or to speak with members of the technical applications team.

The full line of PreciseFlex™ robot models include:

- [PreciseFlex™ DDR robots](#), in 4- and 6-axis models with a tall Z-axis and large cylindrical working volume in a compact footprint.
- [PreciseFlex™ 100](#) Cartesian, featuring a space-saving design that delivers speed and safety. The world's only collaborative cartesian robot.
- [PreciseFlex™ 400](#), ideal for benchtop applications where price, ease-of-use and space are critical.
- [PreciseFlex™ 3400](#), ideal for small parts handling and consumer electronics testing.

If you haven't made plans yet to attend AACC 2022, [register here](#). For more information on Brooks Automation or PreciseFlex collaborative robots, visit <https://www.brooks.com>.
